

Task 1

The greenhouse effect is.....

Greenhouse gases can accelerate the greenhouse effect by.....

Task 2 Greenhouse gases are very important in keeping the Earth's temperature at the correct level so that we can live - therefore it is vital that these remain balanced.

Natural causes

Human causes

Global Warming

Aspire: To explain how humans accelerate the greenhouse effect.
Challenge: To know the natural and human causes of global warming.

Task 3 - Which of these everyday processes have an effect on global warming? Circle the effects that do.

Going on Holiday to Spain on an aeroplane	Driving the car	Turning on the Central Heating
Buying fruit from a local farm	Drying clothes on the washing line	Riding a bike
Going on a local camping holiday	Drying clothes in a tumble dryer	Putting the kettle on
	Buying fruit that was grown in South Africa	Walking to school
		Turning on the lights

Task 4 - Which is the odd one out?

1	Carbon Dioxide	Methane	Nitrous Oxide	Oxygen
2	Deforestation	Eating Burgers	Using Solar Panels	Leaving the lights on
3	Coal	Wind	Oil	Gas
4	Aerosols	Aeroplanes	Cars	Powerstations
